

Megular Component Video Cable Specifications

Megular is designed to get the absolute best performance out of your component video connection. It is equally well suited for connecting DVD players, HD receivers, game consoles, and anything else with a component video output to your display of choice, whether it be projector, plasma, LCD, DLP, etc...

Hype or not, the Megular really is going to bring out the best resolution and color saturation possible from a component video source. There's no other component video cable as good as Megular and it's something anyone can see right out of the box.

Features include ultra high bandwidth coaxial cable with copper deposited on a ferrous core conductor, continuous common grounding for all three cables, 100% high magnitude RF shielding and hermetically sealed (potted) termination.

Compared to the competition, Megular is a giant leap forward in its engineering, build quality, and performance. Let us show you how good your video can look. 60-day 100% satisfaction guarantee.

Made by Zu in Utah, USA.
RoHS compliant
Lifetime warranty.

Device Under Test	Megular 6.6' (2.0 m) [RCA > RCA coax connectors]
Bend Radius	2.5" (5.1 cm)
Cable Diameter (Largest Point)	0.54" (1.37 cm)
Structure	Zu tri-lobed coax with continuous ground
Bandwidth	> 1 GHz
Cp	126 pF / channel
RF Shielding	100% medium magnitude full bandwidth
Shield Details	continuous common shielding
Tolerance	0.1%
